

# What is the difference between a Flash preview and an MJPEG one?

Last Modified on 20/11/2018 8:51 am AST

Only visible to:

## Requirements:

- LU-Central running on V7 and above (relevant for OPS users)
- LiveU server with version 7 and above.
- MJPEG license enabled

## Comparison:

Category	Flash	MJPEG
Plugin required	Yes (supported on most browsers)	No. Native support with HTML5.
Framerate	30 Fps	10 Fps
Audio	Included	Not included*
CPU consumption	Low	Negligible
No. of preview	Limited due to CPU constraints	Unlimited

s		
Loading time	A few seconds	Instant
iOS support	No	Yes
End of support	2020	TBD

\*When using MJPEG you can enlarge the preview picture, the enlarged video includes audio (uses flash).
